

Jr. .NET Software Developer

Reports To: Manager, Implementation Services

Description:

The Implementation Services Jr. .NET Software Developer position assists in the development of InspectTech's customized product with a focus on designing reports and customizing web forms. The position requires interfacing cross-functionally with other teams, communicating effectively (both written and verbal), and utilizing problem solving and technical skills to implement customer solutions.

Duties and Responsibilities:

- Effectively analyzing and organizing requirements communicated from internal and external customers in order to design and implement custom reports and web forms.
- Analyzing and troubleshooting support requests in order to directly resolve bugs or escalate to other team members.
- Implementing solutions using a variety of tools, including .NET, C#, SQL, ActiveReports and other graphical and report generation tools.
- Working with developers to identify and resolve more complicated problems.
- Codifying repeat issues into documented or scripted processes.
- Communicating development issues to management for both implementation and scheduling purposes, participating effectively in the design process and software development life cycle in a team environment, and taking ownership of previously existing software.
- Handling several concurrent tasks and meeting scheduled milestones for each.
- Interfacing with internal customers and InspectTech's technical support team in a high-energy environment.
- Other duties as assigned.

Requirements:

- BS Computer Science or equivalent.
- One to three years' experience in software development.
- Intermediate knowledge of Microsoft .NET Framework and C#.
- Intermediate knowledge of reporting tools (e.g. ActiveReports, Crystal Reports, or equivalent).
- Intermediate knowledge of operating systems (e.g. Microsoft Windows XP, Windows 7).
- Intermediate knowledge of relational databases (e.g. Microsoft SQL Server).
- Possess excellent written and verbal communication skills.
- A motivated self-starter with an ability to work unsupervised.

Pluses:

- Experience working for Application Service Provider (ASP) or Software as a service (SaaS) company.
- Familiarity with bridge inspection process.
